# FED test

Task 1: Puzzle App

Create an app that:

Inputs a number A and creates a grid A X A e.g:
input 3 OUTPUTS 3 X 3 grid

Each square in grid is assigned a number between 1 and A X A and shuffled randomly.

7	3	1
5	9	2
4	6	8

Use drag and drop to move the individual squares and upon setting them in right order, popup a message that says welcome to the team.

Note:

- The diagrams provided are for instruction only. DO NOT COPY the style.
- This has to be done using ReactJS latest version.
- Use your design talents to make it beautiful and seamless.
- The puzzle logic has to be custom coded, you can't use an existing package to achieve puzzle functionality.
- Share the source code on Github.
- Stage the built code and share the link.
